Task Description

Title	#3659999 : [PS12n] Gate access to non-app-friends by a capability
Created	Feb 3, 2014 4:41pm
Creator	Simon Cross
Updated	Feb 5, 2014 6:35pm
Tags	platform api launch-blocking PS12n ps12n friends apis
Subscribers	Steven Elia, Benjamin Golub, Harshdeep Singh, TR Vishwanath, Simon Cross, Eddie O'Neil
Priority	hi-pri
Assigned to	Steven Elia
Description	<p>Apps which have enabled the platform simplification migration won't get access to non-app friends. That means calls to /me/friends will only return the subset of the user's friends who have also TOS'd the app.</p> <p>Some apps have a valid use case to access non-app friends. Examples:</p> <ul style="list-style-type: none">- Venmo allow you to send a payment to a non-app friend- Bing needs this to display public data from your friends which they acquired via the firehose <p>As such, we will need a new capability: "can_read_non_app_friends"</p> <p>When apps with this capability request /me/friends AND where the user has granted the user_friends permissions, the API will return the full set of the users friends, including friends who have not TOS'd this app.</p>
