Task Description

Title	#3659999 : [PS12n] only return app-friends via v2.0 by default, unless the app has various capabilities which bypass that restriction
Created	Feb 3, 2014 5:41pm
Creator	Simon Cross
Updated	Mar 20, 2014 12:13pm
Tags	platform api launch-blocking pe-games api-versioning PS12n API Eng ps12n friends apis
Subscribers	Ilya Sukhar, Steven Elia, Benjamin Golub, Harshdeep Singh, TR Vishwanath, Simon Cross, Amir Naor, Dan Xu, Eddie O'Neil
Priority	hi-pri
Assigned to	Steven Elia
Depends on	• #3937151 : platform.userappdata:{N}:s{N}:c{N} surged in platform / api after 3/11 weekly PHP push
Blocks	• #3927921 : /v1.0/me/friends shows non-app friends still
	• #3927917 : v1.0/me/friends returns NAF
Description	Apps which have enabled the platform simplification migration won't get access to non-app friends. That means calls to /me/friends will only return the subset of the user's friends who have also TOS'd the app.

1

Some apps have a valid use case to access non-app friends. Examples:
- Venmo allow you to send a payment to a non-app friend
- Bing needs this to display public data from your friends which they acquired via the firehose

As such, we will need a new capability: "can_read_non_app_friends"

When apps with this capability request /me/friends AND where the user has granted the user_friends permissions, the API will return the full set of the users friends, including friends who have not TOS'd this app.

Comment History

Steven Elia: Feb 20, 2014 7:25pm
We also need to not send realtime pings when a non-app friend is added/removed.

Simon Cross: Mar 14, 2014 6:29pm
◄ Merged task #3927917 here.

Harshdeep Singh: Mar 19, 2014 3:54pm
Steven: Can we close this task and just keep the backfill migration task open?

Steven Elia: Mar 19, 2014 4:28pm
Well the breaking change also needs to be moved to the versioned migration.

Steven Elia: Mar 19, 2014 9:04pm
Also I need to check if the user installed in V2 mode.

Harshdeep Singh: Mar 20, 2014 12:13pm
