Re: your last point, agreed.

Note that unified review is part of Dev tools that Constantin drives and that will follow the same process

I was referring to the deprecation part of Platform 3 -- unified review is just another product feature to improve quality, not the "protect the business/model/data" that the API changes represent.

> Makes sense. I will make sure that Marie and Fran are looped in to developing the messaging. As it comes together, I'll bring it to our 1:1:1:1 to make sure everyone is on board.
>
> In terms of the roadmap, I'll ensure that we also include the policy and ops changes which will play an important role in the overall dev reaction. For instance, as we launch Unified Review, the narrative will focus on quality and the user experience which will potentially provide a good umbrella to fold in some of the API deprecations and canvas redirect enforcement.

Great -- thanks.

Marie, I'll follow-up with you separately about thisŠ

Fran: Marie is going to PM the canvas redirect policy change too. We
    think there may be some product changes that Marie is working on.
    I think
    this means that all the "changes" are getting PM'd by Marie.
